

Completely Clear 1200

Filter and Fountain Kit

Completely Clear 1200 User Instructions

- Mount the transition piece with the nozzle you want on the outlet of the pump (1).
- Optional: Mount the distribution valve (2) for branching off to a waterfall.
- Place the filter in the pond. Never place the filter in the bottom sludge. Elevate the filter with a bed of stones or like material.
- This pond filter is a biological filter. This means that the biological action will optimize after a few weeks. During the growing season, it is advisable to let the filter function continuously. When the filter will not be used for longer period of time (5 hours or more), the colony of bacteria will die for the most part. Add nitrifying bacteria to start up the biological process.
- During the winter season, at temperatures below 32°F, the filter should be turned off. Clean all parts and keep them in a dry frost free place.
- Disconnect the electrical supply before performing any maintenance.
- The effective life of the UV-C lamp is approx. 70000 hours. It is suggested that the bulb should be replaced at the beginning of each pond season.
